Portfolio Site: luisaleman.netlify.app

Front-end developer with experience using front-end technologies such as React, JavaScript, and TailwindCSS.

Experience

HealthStream   **Sep. 2023 – December 2023**
Front-End Software Engineer Intern   *Nashville, TN*
- Developed and refactored multiple React components, improving both the functionality and user interface of HealthStream's developer portal
- Updated and improved the developer portal's styling using TailwindCSS, creating a more responsive and visually appealing user experience
- Designed and implemented a POC for an API usage chart using Figma, React, and ChartJS, showcasing the visualization of API call frequencies with mock data
- Utilized Azure DevOps for project management, handling tickets on Azure boards and managing code merges and integrations via pull requests

Education

Western Governors University   **Graduated January 2024**
Bachelor of Science, Software Engineering   *Salt Lake City, UT*
- **Certifications:** AWS Certified Cloud Practitioner, CompTIA Project+, ITIL 4 Foundation
- **Relevant Coursework:** Data Structures & Algorithms, Software II - Advanced C#, Software Design & Quality Assurance, Software Security & Testing, Advanced Data Management, Cloud Foundations

Technical Skills

Languages:
- **Proficient:** JavaScript, HTML, CSS, SCSS, SQL
- **Familiar:** TypeScript, Python, C#

Technologies/Frameworks:
- **Proficient:** React, Bootstrap, Tailwind, ChartJS, Git, Figma, npm
- **Familiar:** Redux, NodeJS, Angular, NextJS, MaterialUI, Zod, PropTypes, Express, Jest, Firebase, Postman, .NET Maui, Winforms, MongoDB, AWS (EC2, S3, IAM), Azure, Heroku

Projects

PlanetRandomItems | **E-Commerce Site** | **React, React Router, Redux, JavaScript, Bootstrap**
- Designed a clean and user-friendly e-commerce site with the ability to browse and view products, as well as product descriptions and ratings
- Developed a fully functional shopping cart using React and Redux, and used React Router for routing between different components

planetrandomitems.netlify.app

The Journal | **Booklist** | **JavaScript, Bootstrap, NodeJS, Express, MongoDB, EJS, Heroku**
- Implemented CRUD operations allowing users to add, view and delete books from database
- Utilized a templating language, EJS, to dynamically render a table displaying all books in database

github.com/KrOhDee/the-journal

JitsuCavern | **Jiu-Jitsu Video Streaming Site** | **React, JavaScript, FirebaseAuth, Firestore, YouTubeAPI, Axios**
- Developed a full-stack Jiu-Jitsu streaming site and implemented CRUD functionality for the user's playlist, including adding and removing videos
- Integrated Firebase Authentication and Firestore to provide secure user authentication and database management

jiu-jitsu-library-41b02.web.app

EasyTrack | **Academic Scheduling App** | **C#, .NET Maui, SQLite, Visual Studio**
- Developed a cross-platform academic scheduling application using .NET MAUI, allowing students to organize terms, courses, and assessments with SQLite for data storage
- Implemented a notification system to alert students of upcoming assessments, facilitating academic planning and time management
