Experience

HealthStream   **Sep. 2023 – December 2023**
Front-End Software Engineer Intern   *Nashville, TN*

- Developed and refactored multiple React components, improving both the functionality and user interface of HealthStream's developer portal
- Updated and improved the developer portal's styling using TailwindCSS, creating a more responsive and visually appealing user experience
- Designed and implemented a POC for an API usage chart using Figma, React, and ChartJS, showcasing the visualization of API call frequencies with mock data
- Utilized Azure DevOps for project management, handling tickets on Azure boards and managing code merges and integrations via pull requests

Education

Western Governors University   **January 2024**
Bachelor of Science, Software Engineering   *Salt Lake City, UT*

- Relevant Coursework: Data Structures & Algorithms, Software II - Advanced C#, Software Design & Quality Assurance, Software Security & Testing, Advanced Data Management, Cloud Foundations
- Certifications: AWS Certified Cloud Practitioner, CompTIA Project+, ITIL 4 Foundation

Technical Skills

Languages:
- **Proficient:** JavaScript, HTML, CSS, SCSS, SQL
- **Familiar:** TypeScript, Python, C#

Technologies/Frameworks:
- **Proficient:** React, Bootstrap, Tailwind, ChartJS
- **Familiar:** Angular, NextJS, Redux, MaterialUI, Zod, PropTypes, NodeJS, Express, .NET Maui, Winforms, MongoDB, AWS (EC2, S3, Lambda, IAM, RDS), Azure

Developer Tools:
- **Proficient:** Git, GitHub, GitLab, npm, Figma, Canva
- **Familiar:** Firebase, Heroku, Postman, Jest, Webpack, Babel

Projects

PlanetRandomItems | **E-Commerce Site** | **React, React Router, Redux, JavaScript, Bootstrap**
- Designed a clean and user-friendly e-commerce site with the ability to browse and view products, as well as product descriptions and ratings
- Developed a fully functional shopping cart using React and Redux, and used React Router for routing between different components

planetrandomitems.netlify.app

The Journal | **Booklist** | **JavaScript, Bootstrap, NodeJS, Express, MongoDB, EJS, Heroku**
- Implemented CRUD operations allowing users to add, view and delete books from database
- Utilized a templating language, EJS, to dynamically render a table displaying all books in database

github.com/KrOhDee/the-journal

JitsuCavern | **Jiu-Jitsu Video Streaming Site** | **React, JavaScript, FirebaseAuth, Firestore, YouTubeAPI, Axios**
- Developed a full-stack Jiu-Jitsu streaming site and implemented CRUD functionality for the user's playlist, including adding and removing videos
- Integrated Firebase Authentication and Firestore to provide secure user authentication and database management
